

HU-FRIEDY HD MIRRORS

| New from Hu-Friedy

FACT

According to experts, 99% of diagnostics in dental is visual.* In order for clinicians to deliver accurate diagnoses, their mouth mirror needs to provide the highest degree of clarity and visibility in every procedure.

CHALLENGE

Standard rhodium-coated mirrors offer average clarity and visibility, keeping the clinician from reaching the highest level of performance.

SOLUTION

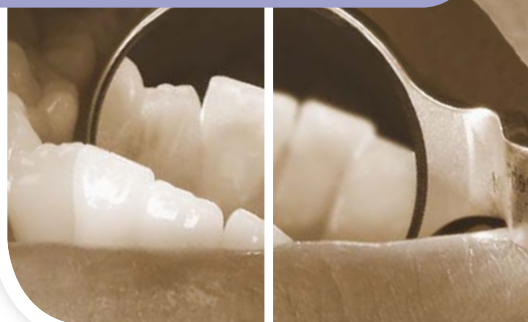

Hu-Friedy's new High Definition Mirrors feature a proprietary coating that provides superior brilliance and color for increased visibility in all dental procedures. Also scratch-resistant, our HD mirrors are the clear choice for optimal patient treatment.

WHY OUR HD MIRRORS ARE SUPERIOR

- 113% reflection factor for exceptional image clarity**
- 38.5% brighter than rhodium coated mirrors**
- 50% brighter than other front surface mirrors**
- Scratch-resistant for product longevity
- Large ergonomic handle options
